

Flohs plant islands are branded products handmade in Germany. These on the water floating plant islands can be so much more than just beautiful.

Handling	The living island
 <p>Scan the QR code with your mobile Phone camera.</p>	<p>Creation of new habitats for insects, above and below water. Natural water purification, without the use of substrates. Reduction of algae growth through repositioning plants. Covering the water surface to protect against fish predators with a very calming effect on your fish population. Reduction of evaporation losses at high outside temperatures and shading effects when there is a lot of sunlight. Stabilisation of the water values. No dirt accumulation due to the plant island. Roots floating in the water invite your fish to nibble without damaging the plants. The island serves as a spawning aid.</p>
